PROFILE SUMMARY

Postgraduate student in Computer Science with a strong foundation in software development and cybersecurity. Skilled in designing secure, scalable applications and experienced in integrating AI and cloud-based solutions. Adept at problem-solving, system analysis, and applying security best practices to deliver reliable and user-friendly digital solutions.

EDUCATION

The Oxford College Of Science - Bengaluru

Master Of Computer Applications

December 2024 - November 2025

The Oxford College of Science - Bengaluru

Bachelor Of Computer Applications - CGPA : 8.17

September 2020 - August 2023

SKILL SUMMARY

- **Languages** : Python, Java, C, SQL, TypeScript
 - **Frameworks** : NextJS, NodeJS, ReactJS, Tailwind CSS
 - **Technical Skills** : VS Code, Docker, Git, Linux, VirtualBox, Wireshark, Burp Suite
 - **Soft Skills** : Problem-Solving, Attention to Detail, Collaboration
-

PROJECTS

AI Mock Interview Platform - [Link](#)

July 2025 - November 2025

(React, Vite, Typescript, Firebase, Clerk, Google Gemini AI, ESLint)

- Designed and deployed a full-stack platform automating 100% of mock interviews, cutting interview prep costs by ~70%.
- Integrated Gemini AI to generate domain-specific technical questions and evaluate responses, increasing interview realism for 200+ test users.
- Optimized platform scalability to handle 500+ concurrent sessions with <200ms latency.
- Delivered instant, adaptive feedback improving user readiness scores by 40% in trial runs.

Patient Record Management System - [Link](#)

February 2025 - June 2025

(NodeJS, NextJS, TypeScript, ShadCN, Appwrite, Twilio)

- Built a secure medical records platform with role-based access, ensuring compliance with healthcare data privacy standards.
 - Integrated Twilio API to enable secure patient-provider messaging, appointment reminders, and real-time notifications, leading to improved engagement and a ~25% reduction in missed appointments.
 - Developed scalable CRUD operations using Appwrite's cloud database, ensuring secure and efficient storage/retrieval of patient records with audit logs for compliance and reliability.
 - Designed a modern, accessible UI with ShadCN components, improving navigation and usability, which streamlined workflows and boosted doctors' task completion efficiency by ~30%.
-

INTERNSHIP

Infotact Solutions

August 2025 - November 2025

- Completed a Data Science & Analytics internship at Infotact Solutions, mastering Python for data science and advanced statistical analysis.
 - Built and deployed machine learning and deep learning models, supported by end-to-end data pipelines and big data technologies.
 - Created clear, compelling data visualizations to communicate insights effectively.
 - Applied MLOps best practices to ensure scalable, reliable model development and deployment.
-

INDUSTRY TRAINING AND SIMULATIONS

Deloitte Cyber Job Simulation - [Certificate](#)

- Completed a job simulation involving reading web activity logs
- Supported a client in a cyber security breach
- Answered questions to identify suspicious user activity.

Accenture Software Engineering Job Simulation - [Certificate](#)

- Assessed infrastructure and security requirements for a Digital Health platform, recommending cloud-based solutions and implementing IAM policies. Integrated security practices into the SDLC, performed code reviews and testing, and designed an Agile-based project execution strategy.

Tata Cyber Security Analyst Job Simulation - [Certificate](#)

- Completed a job simulation involving identity and access management (IAM) for Tata Consultancy Services, collaborating with a Cybersecurity Consulting team.
 - Acquired expertise in IAM principles, cybersecurity best practices, and strategic alignment with business objectives.
 - Delivered comprehensive documentation and presentations, showcasing the ability to communicate complex technical concepts effectively.
-

CERTIFICATIONS

OCI AI Foundations - [Certificate](#)

- Gained hands-on experience with Generative AI, Large Language Models, and deep learning architectures such as CNNs, RNNs, and LSTMs, while applying supervised and unsupervised machine learning techniques to real-world problems on Oracle Cloud Infrastructure.
- Explored and utilized OCI AI services including Generative AI, Oracle 23ai Vector Database, vision, speech, and document understanding, and developed the ability to evaluate, select, and deploy AI solutions effectively to address diverse business challenges.

Oracle Data Science Professional - [Certificate](#)

- Configured and managed OCI Data Science workspaces and projects, leveraging the ADS SDK for efficient end-to-end ML workflows.
- Implemented complete machine learning lifecycle including data preparation, model training, evaluation, and deployment.
- Applied MLOps practices to automate, monitor, and scale machine learning solutions in cloud environments.
- Integrated OCI services such as Vault, Object Storage, Generative AI, Data Flow, and Data Labeling to deliver robust business-focused ML solutions.
